

BOSS: Business Organization Software Solutions

Novilis is an IBM Business Partner specializing in providing BOSS, such as Lotus Notes & Domino, Lotus Quickr, Lotus Sametime and eForms based on IBM Websphere Portal. The company employs a skilled and certified IBM team in the field of development, administration and training. This team provides a range of solutions including consultation, infrastructure management, application development; as well as training and implementation services.

Fields of activity

- Professional consultation and design of Lotus Notes & Domino, including upgrading from previous versions of Notes and migration from other messaging solutions.
- Ongoing support for existing Domino infrastructure.
- Development of Domino based solutions. Novilis develops solutions that improve organizational collaboration. Our applications enhance organizational processes both within Client/Server and Browser/Server architectures.
- Development and implementation of organizational portals.
- Linking Domino applications to Legacy systems in the organization.
- Implementation of information security solutions in the Domino environment, such as Anti Spam solutions.
- Implementation of Lotus Quickr solutions: content sharing, such as document and rich media, across connected groups inside or outside the company firewall.
- Implementation of business eForms based on IBM Websphere Portal, including integration with exiting automated business processes.
- Implementation of Lotus Sametime unified communications solutions: organizational instant messaging and presence awareness, on-line meetings, audio/video conferencing, and unified telephony including integration to business telephone systems.
- Training, implementation and Helpdesk services for the organization's users.
- Outsourcing and software services for the customer.
- Selling IBM Lotus software licenses.
